Project Name	Project - Visualizing and Predicting Heart Diseases with an Interactive Dashboard

Cognos Analytics Story:

- A Story contains a set of scenes that are displayed in sequence.
- Stories are similar to dashboards because they also use to share your insights
- Stories differ from dashboards because they provide an over-time narrative and can convey a conclusion or Recommendation.

Story Card of Heart disease Prediction Dataset Using Cognos Analysis:

USN:6,7:

As a Data analyst, I create a predicted model by also preparing story card with using explored data.

As a Data Analyst, I will analysis of the heart disease patient's datasets.
