Proposed Solution Template

S.No.	Parameter	Description
1.	**Problem Statement (Problem to be solved)**	➢ Coronary Artery Disease(CAD) is the most common heart problem. ➢ With CAD, a person may get blockages in their coronary arteries, the vessels that supply blood to their heart. ➢ That can lead to a decrease in the flow of blood to their heart muscle and reduce the oxygen level too.
2.	**Idea / Solution description**	➢ Stop eating unhealthy foods. ➢ Measure the amount of calcium in the walls of coronary arteries. ➢ Try to workout physical activity in your daily life.
3.	**Novelty / Uniqueness**	➢ Cardiac catheterization, inserting tubes into patients coronary arteries to evaluate or confirm CAD. ➢ Electrocardiogram records heart's electrical activity which can detect heart issues.
4.	**Social Impact / Customer Satisfaction**	➢ Treatment for CAD often includes lifestyle changes, risk factor management and medications. ➢ Some people may also benefit from a procedure or surgery.
5.	**Business Model (Revenue Model)**	➢ Aim for an eating plan that's low in saturated fats. ➢ Keep blood pressure under control.

6.	**Scalability of the Solution**	➢ A lifestyle changes should be made to reduce the risk of developing further health problems.
